

**APPENDIX 3/D**  
**2045 RTP FISCALLY CONSTRAINED**  
**PROJECTS LIST BY COUNTY**

## **Appendix D: Fiscal Constraint**

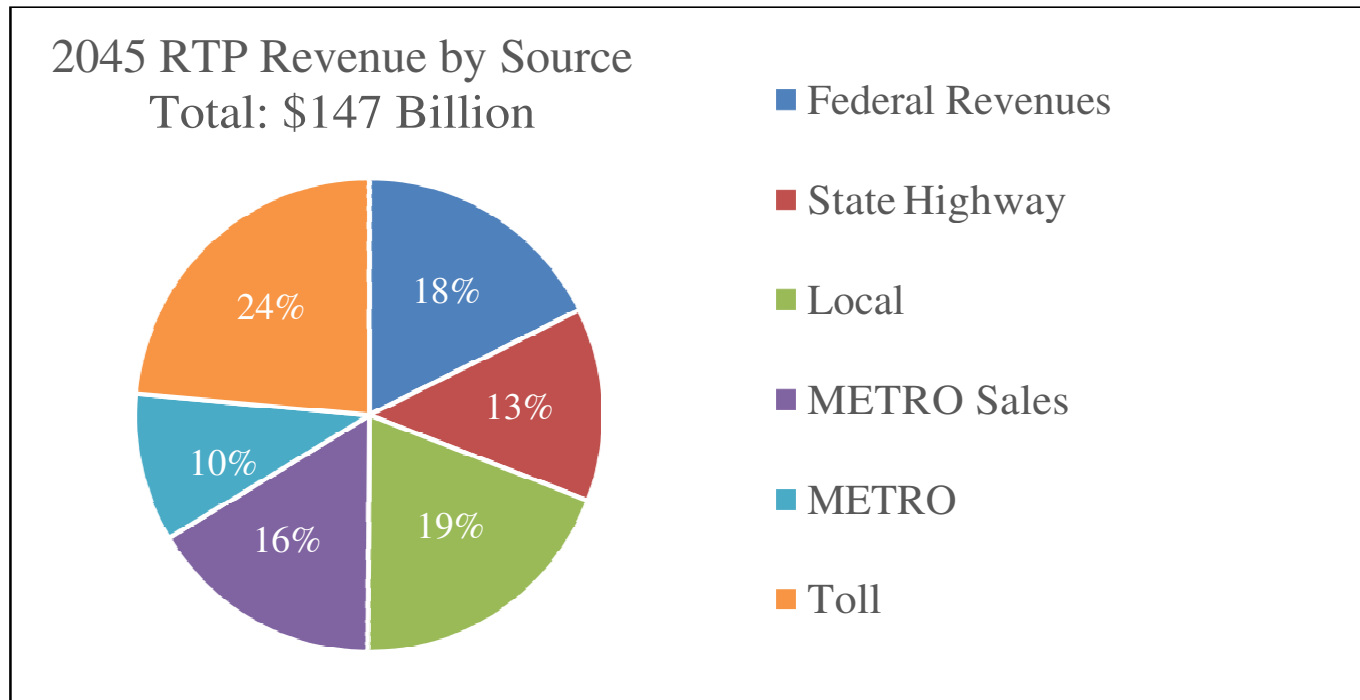

“Fiscal constraint” is a planning tool the 2045 RTP utilizes to balance recommendations with reasonably expected revenues. The Transportation Policy Council (TPC) regularly updates the RTP in order to ensure the latest assumptions regarding available funding are included. The 2045 RTP limits the estimated cost of all recommendations to an estimate of total future funding available to implement those recommendations.

H-G AC developed a financial model to estimate both expenditures and revenues through the year 2045 in order to calculate fiscal constraint for the 2045 RTP. Based on the latest planning assumptions, the 2045 RTP estimates—in “nominal” dollars—approximately \$132 billion worth of recommended investment (or “expenditures”) in this region by 2045, which is less than the approximately \$147 billion worth of total revenues available for the recommended improvements. Year-of-expenditure-value dollars are included in this Appendix in order to conform to more official expectations and certain regulatory requirements.

### **Revenues**

Revenues estimated for the 2045 RTP, a total of approximately \$147 billion, includes different levels of funding sources: federal, state, and local. The estimate is based on growth in the main drivers of revenue sources, such as population, GDP, interest rates, and consumption of gasoline. These projections are then applied to financial reports from project-sponsoring agencies such as municipalities, counties, transit agencies, and toll road authorities. Utilizing an agency’s financial information allows for the integration of current fare or toll rate change policies and conforms the estimate to a more realistic scenario.

Federally, the main source of funding is the Highway Trust Fund—supported mostly by the federal gas tax, currently set at 18.4 cents per gallon of gasoline sold. The model includes the latest congressional action regarding the Highway Trust Fund, and assumes, in general, that the federal government will transfer whatever money is necessary in the future to avoid defaulting on both current obligations and future levels of needed funding. Additionally, USDOT provides competitive grant opportunities every year through discretionary grant programs, 2045 RTP assumes the H- GAC TMA region will receive up to \$ 12 Billion through the life of the plan. At the State level, the main source of funding is the State Highway Trust Fund (supported mainly by a tax on gasoline at 20 cents per gallon sold), and two voter-approved constitutional amendments—Proposition 1 and Proposition 7.

**Figure 1: Revenues by Source**

The Texas Legislature increased state-level revenues by significant amounts. Firstly, they passed (and voters later approved) Proposition 1, which dedicated a certain percentage of the state oil and gas severance tax to the State Highway Fund for use on publicly owned non-tolled roadways.

The following legislative session, the Legislature followed up on this action by passing (for later voter approval) Proposition 7, a similar constitutional amendment which dedicated a certain percentage of states sales and motor vehicle rental/purchase tax to the State Highway Fund— also for use strictly on public owned non-tolled roadways. Additionally, the Legislature ended an historical diversion of State Highway Fund revenue for various non-transportation needs. The 2045 RTP assumed the total increase of these three changes to be around \$20 billion.

Locally, revenues are estimated based on future capacity of any certain local agency (including municipalities, counties, transit agencies, toll road authorities, and other qualified public entities) to invest in regional transportation by providing a local match, or share thereof, in sponsorship of the recommended programs or corridors presented in the 2045 RTP. The estimate includes all current and planned sources of revenue from tolled and transit projects, as well as assumptions the current revenue-sharing agreements among planning partners will continue through the life of the RTP.

<b>Examples of Various Revenue Sources</b>		
<i>Federal</i>	<i>State</i>	<i>Local</i>
Motor Fuel Tax	Federal Reimbursements	METRO Farebox
Transfers from General Fund	Motor Fuel Tax	METRO Sales Tax
	Lubricant Tax	HOT Lanes
	Title Fees	Local government investment income
	Commercial Transportation Fees	Bond interest
	Oversize/Overweight Permit Fees	Transfers
		Property taxes
		Toll receipts

This estimate does not include new sources of funding which would technically require legislative action or local voter approval for, such as a future VMT-based fee or the adoption of “local option” dedicated taxes or fees.

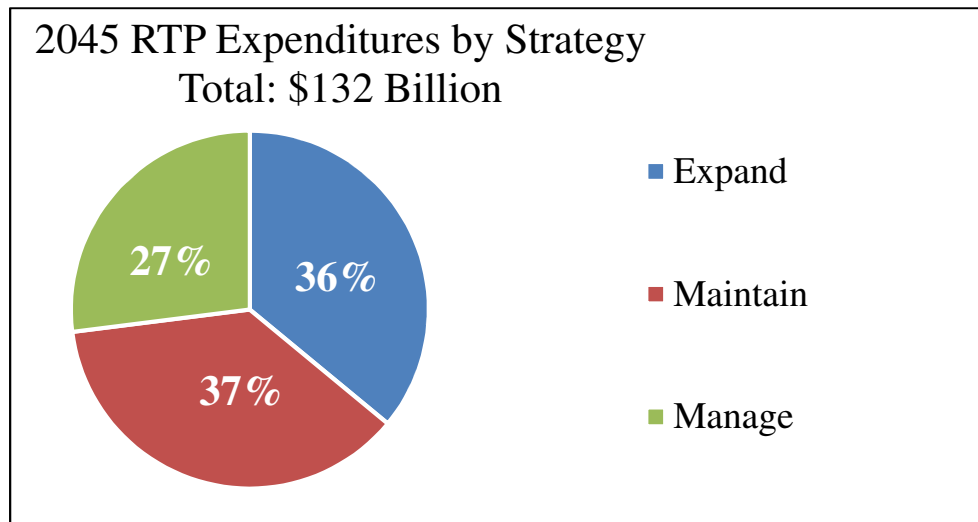

The state and federal motor fuels tax source is disproportionately affected by the average miles-per-gallon rating of the single occupant private vehicles in Texas—a figure that has been rapidly developing. The average fuel efficiency of the Texas personal vehicle fleet is forecast to increase from its current level of about 21 MPG to about 29 in 2045. Extensive calculation is included in the revenue estimate model to account for this profound and widespread change and its effects on future available transportation investment funds.

## Expenditures

In addition to estimating revenues, the 2045 RTP estimates project expenditures, or the total costs associated with implementing the recommendations in the plan. This estimate of about \$141 billion includes assumptions for the cost of maintenance and operations of current and future facilities. The expenditure estimate is calculated as a sum of total costs associated with implementing the recommendations in the plan.

This includes basic project characteristics, the duration of construction time, and relevant contingency costs.

**Figure 2: Expenditure by Strategy**

The expenditure estimate is depicted according to Strategy in the 2045 RTP, in order to link the particular investments with the goals for the region. Most of the recommended expenditures, approximately 64% or \$84 billion, are dedicated to the current transportation system's preservation and efficient operation. Only about 34 cents of every investment dollar is available for adding capacity to the transportation system, whether roads, rail, transit, or active transportation modes.

### US 290 Revised Lane Configuration

This conformity determination reflects a revised interim lane configuration for US 290 between IH 610 and SH 99 (Grand Parkway). The revised lane configuration is necessary due to engineering-related design issues and changes in the funding and operational agreements between the Texas Department of Transportation (TxDOT) and Harris County.

Compared to the previous interim lane configuration the US 290 reconstruction and widening projects will include one additional general-purpose lane in each direction from IH 610 to SH 6 and will also include a one-lane reversible High Occupancy Vehicle/Toll (HOV/HOT) lane in the center of the main lanes between IH 610 and SH 99 (Grand Parkway).

The following table summarizes the changes to the US 290 lane configuration:

Limits	Lane Type	Previous Interim Configuration	Revised Interim Configuration
IH 610 to SH 6	Inbound General-Purpose Main lanes	4	5
	Outbound General-Purpose Main lanes	4	5
	Reversible Managed Lanes (HOV/HOT)	3	1
SH 6 to SH 99	Inbound General-Purpose Main lanes	4	4
	Outbound General-Purpose Main lanes	4	4
	Reversible Managed Lanes (HOV/HOT)	2	1

Reconstruction of US 290 is complete, and all segments were open to traffic in 2019. Because construction of the affected US 290 projects began before the planning period covered by the current metropolitan transportation plan (2045 RTP) and transportation improvement program (2019-2022 TIP), the interim reconstruction projects are not listed in this appendix.

Please note, this revised interim lane configuration does not alter the ultimate improvements proposed for the corridor, which include construction of a 4-lane managed lane roadway along Hempstead Rd to accommodate high-occupancy and toll users. Implementation of the ultimate project scope, as documented in the Final Environmental Impact Statement (FEIS) and Record of Decision (ROD), continues to be proposed within the 2045 RTP and is anticipated to be open to traffic by the 2035 milestone year.

H-GAC has consulted with TxDOT, METRO and Harris County regarding these changes, and the latest available design schematics have been used to code the travel demand model.

More information regarding US 290 projects and the revised lane configuration can be found online at [www.my290.com](http://www.my290.com).

## *Regionally Significant Projects Definition*

### Regionally Significant Roadway Projects

Projects on regionally significant roadways will be treated as Non-exempt projects<sup>1</sup> if they:

- a) Provide additional through traffic lanes greater than 1 mile in length;
- b) Construct a bypass to a principal arterial/interstate along on a new alignment;
- c) Add or extend freeway auxiliary/weaving lanes from one interchange to a point beyond the next interchange;
- d) Construct a new interchange that provides access from or allows movement between facilities that was not previously possible;  
*and/or*
- e) Remove an existing interchange and result in the elimination of access from or movement between facilities which previously existed;

Regionally significant roadways are limited to:

1. All freeways, tollways and other highways classified as principal arterial or higher; *and*
2. As identified in the conformity document, select highways currently designated as minor arterials that serve significant interregional and intraregional travel, and connect rural population centers not already served by a principal arterial, or connect with intermodal transportation terminals not already served by a principal arterial.

### Regionally Significant Transit Projects

Any transit facility within an exclusive right-of-way (“fixed guideway”) that offers an alternative to regional highway travel including light rail, commuter rail, bus rapid transit, and barrier separated HOV lanes will be considered regionally significant.

### Other Projects

The regional significance of non-exempt projects<sup>1</sup> not addressed in the above statements will be decided on a case-by-case basis through the interagency consultation process. The consultation will occur before taking the plan to TPC (either plan or TIP revision), and prior to the environmental determination.

---

<sup>1</sup>Non-exempt projects include all projects that are not identified under 40 CFR § 93.126 and 40 CFR § 93.127 as exempt or exempt from regional emissions analysis.
